Summary

Computer professional with over twelve years experience in the development of web sites. Skilled in Web User Interface Design, and Responsive Design for Mobile Optimization. Proficient in HTML and CSS. Knowledge of JavaScript, jQuery, and PHP. Experience handling multimedia on the web. Good knowledge of web standards, usability and accessibility issues, as well as Search Engine Optimization strategies. Strong communication and research skills. Thorough and highly motivated.

Experience

Webmaster – Front-end Web Developer (/03 - present)

Lucar Informatique – LucarInfo.com, Montreal, Quebec

Design and develop web sites using HTML, CSS, Javascript, jQuery, and PHP for interactivity. Know how to write code that gets W3C approval. Design sites that are responsive and functional, have a clean look, and provide clear and friendly navigation and easy accessibility. Use graphic software to create and optimize images and multimedia tools to add sound and animation.

Validate usability on different browsers and troubleshoot code where required. Continue to maintain content and code on most sites, validating links and adding any new features requested. Submit to directories and major search engines, performing Search Engine Optimization strategies to give good results.

A portfolio of these sites may be found on the following page:
