SUMMARY

Computer professional with over twelve years of experience in the development of web sites. Skilled in Web User Interface Design, and Responsive Design for Mobile Optimization. Proficient in HTML and CSS. Knowledge of JavaScript, jQuery, and PHP. Experience handling multimedia on the web. Good knowledge of web standards, usability and accessibility issues, as well as Search Engine Optimization strategies. Strong communication and research skills. Thorough and highly motivated.

EXPERIENCE

Webmaster – Front-end Web Developer (/03 - present)

Lucar Informatique – LucarInfo.com

Design and develop web sites using HTML, CSS, PHP, JavaScript, and jQuery for interactivity. Know how to write code that gets W3C approval. Design sites that are responsive and functional, have a clean look, and provide clear and friendly navigation and easy accessibility. Use graphic software to create and optimize images and multimedia tools to add sound and video.

Validate usability on different browsers and troubleshoot code where required. Continue to maintain content and code on most sites, making updates and adding any new features requested. Use Search Engine Optimization strategies to give good results.
